

Amherstburg Environmental Advisory Committee 2022 - 2026

The Amherstburg Environmental Advisory Committee is committed to addressing environmental concerns and promoting sustainable practices within our municipality. This work plan outlines our key pillars which support the municipality's overall strategic plan. It serves as a guiding document to achieve our objectives efficiently and cohesively.

Workplan Pillar	Objectives	Activities - <i>List specific activities related to this pillar</i>	Notes/Comments
Natural Vegetation Protection and Enhancement Policy	Increase tree canopy (coverage) and natural vegetation where possible. Support collaborative initiatives between the Town, developers, landowners, public/private agencies and the general public through consultation, planning and action.	Earth Day Tree Planting	
		Tree Giveaway	
		Fall Tree Planting Activities	
Sustainability, Waste Management, Reduction and Diversion	Enhance sustainability through focused waste management strategies, such as reduced waste generation and an increased waste diversion. Prioritize environmental stewardship by emphasizing community engagement, education, and the expansion of recycling and composting infrastructure.	At home composting pilot program	
		Rain barrel program	
		Sanitary Sewer System public education program	
		Litter Pickup Campaign	
		Downtown & Kings Navy Yard Recycling Receptacles	
Community Awareness Campaigns	Sustain an effective and aligned community awareness campaign, to ensuring continuous engagement and education on environmental issues, in harmony with the administration's goals. Aim for consistent outreach activities, leveraging diverse communication channels, to foster community understanding and participation, thereby advancing shared environmental objectives and priorities.	2024 - Trees	
		2025 - Organics
