

Municipal Housing Infrastructure Program – Health and Safety Water Stream

The Town has received a provincial grant for \$3,741,250 to replace and upsize the sanitary sewer on Richmond Street between Dalhousie Street and Seymour Street. This grant represents 73% of the estimated total project cost of \$5,125,000.

The grant program was designed to protect communities by investing in the rehabilitation and expansion of core infrastructure projects to address critical health and safety issues while maintaining the current housing stock. This project includes 425m of sanitary sewer replacement on Richmond Street and will include streetscaping upgrades. The project must be tendered and awarded by March 2027 and has an anticipated 4-5 month construction schedule.
