**Re: Letter of Support - Rotary Club of Amherstburg's HeartStarter AED Project**

To Whom It May Concern,

On behalf of the Council of the Town of Amherstburg, we are pleased to offer this letter of support for the Rotary Club of Amherstburg's HeartStarter AED Project, a community focused initiative aimed at enhancing public safety through the installation of Automated External Defibrillator (AED) cabinets in local parks.

The proposed installation of weatherproof, publicly accessible AED units at Anderdon Park, Malden Park, and Toddy Jones Park represents a proactive and compassionate response to the need for life saving equipment in high use public spaces. These parks are well frequented by residents and visitors, and the availability of AEDs has the potential to make a meaningful difference in emergency situations.

The Town of Amherstburg recognizes and values the Rotary Club of Amherstburg's longstanding commitment to community service and wellbeing. For over 90 years, the Rotary Club has contributed positively to the health, safety, and vitality of our community, and this project is a strong reflection of that legacy.

At this stage, the Town is pleased to express its awareness and support of the HeartStarter AED Project and its underlying community safety goals. Council endorses the Rotary Club of Amherstburg's efforts to pursue funding through the Rotary International District 6400 Community Grant program to help bring this initiative forward for the benefit of our residents.

We appreciate the Rotary Club's continued leadership and dedication to enhancing public spaces and fostering a safer community for the Town of Amherstburg.

Sincerely,

Michael Prue, Mayor  
Town of Amherstburg
